**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/GB 03/04025

D1: Patent Abstracts of Japan vol. 1998, no. 11, 30.09.1998 & JP-A-10165288
D2: US-A-5078668

Ad Section V:

1. D1 discloses an odour absorbing, air-permeable clothes cover comprising an unwoven cloth sewed on three sides to form an envelope for an item of clothing. The lower envelope edge is open and the top edge comprises an opening for a hanger. It follows that claim 1 differs from D1 in that an opening is formed on the front surface extending directly from the lower opening, forming a pair of flaps in the front surface. According to the description, said novel features facilitate the accessibility of clothing within the cover.
To this objective end, D2 discloses a similar clothes cover (12) comprising an elongate front slit (26) covered by a flap (28). Said flap however does not extend to a lower open end. Moreover, a single flap is disclosed and not a pair of flaps. Thus, opening of the flap of D2 does not provide the same degree of access as defined by claim 1. It follows that the feature combination of claim 1 is non-obvious and, as such, meets the requirements of Art. 33(3) PCT. This conclusion applies equally to method (use) claim 15.

Further Comments:

1. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.
2. The reference WO 98/303026 cited on page 6 is probably wrong.
